

**Topic: 30 minutes a day**

**There are two topics running throughout this term.**

- 1) Create a presentation on your chosen river around the world. This is similar to the scientist presentation you did. Include: facts about the river, how does it support animals and humans, how is it polluted, what transport is used on it?**
- 2) Create a pond life leaflet. Include: what animals and plants live in ponds, what information can you tell me about these animals, are ponds polluted? Make sure you make it colourful and exciting. A leaflet needs to be striking to grab people's attention.**

**This week's activity is to continue/start either the presentation on your own river or the pond life leaflet.**
