

Orchard Home learning: Optional activities.

This sheet has some ideas to help support your child in home learning. This can be done at any point throughout their home learning and pictures can be shared on seesaw. The suggestion is to try and complete one a day if you can. Some of them may also be on-going projects.

Science: Experiments

Here are a few different experiments - can you do one a week? The lesson plans are attached.

- Make your own volcano.
- Soap bubble prints.
- Cloud in a jar.
- Fizzy colours.

Art: Create a volcano

Create a volcano out of different junk modelling material. The children could also use paper mache. This projects may take a few days to complete.

Painting:

Paint a volcano scene.

PE: Yoga

Try and complete a daily yoga activity to get you moving.

Geography: Research a volcano

Can you choose a famous volcano and do some research about it? What can you find out? You could create a fact file, draw some pictures of it, or create a PowerPoint. Here are just a few examples of volcanoes you could look up.

- Kilimanjaro
- Mount Etna
- Mount Vesuvius

Phonics/PE/Outdoor Learning:

Write some letters/sounds using chalk on a wall, or something similar. Get your child to throw a ball at the correct sound, or just touch the correct sound.

Outdoor Learning: Winter walk

Go on a winter walk or in the garden. Use the 5 senses to think about what you can see, hear, see, and smell! You could take some pictures or do some drawings. You could then do a bit of writing when you get home about what your winter walk.

Geography: Animals

Can you look up any animals that live near volcanoes? What information can you find out about them? David Attenborough has some good programs on BBC iPlayer.
